SUMMARY

Data Science and AI/ML focused Computer Science graduate (B.Tech, Data Science specialization) with coursework in Data Analysis using Python, Data Mining and Predictive Modelling, Time Series Analysis, Artificial Intelligence and Machine Learning, and Big Data Analytics and Business Intelligence, applied through production-grade projects including a cryptocurrency forecasting system (LSTM R^2 of 0.9933) and an AI-powered portfolio assistant built on a RAG (Retrieval-Augmented Generation) pipeline. Combines this with one year of shipped software engineering experience – REST APIs, authentication, RBAC, database design, and MVC architecture – promoted from Intern to full-time Developer in six months, with active upskilling in Python backend frameworks (Django, Flask) and applied AI engineering (RAG, vector search, LLM integration). Immediately available for full-time Data Science / AI-ML, AI Engineering, or Python Backend Development roles across Delhi NCR.

TECHNICAL SKILLS

Data Science & Machine Learning: Python, Pandas, NumPy, Scikit-learn, Matplotlib, TensorFlow, Data Preprocessing, Feature Engineering, Model Evaluation, Predictive Modelling, Data Mining, Exploratory Data Analysis, Regression, Classification, Statistical Modeling, Deep Learning
Time-Series & Forecasting: ARIMA, SARIMA, LSTM, Bi-LSTM, Sequence Generation, Stationarity Testing, Time Series Analysis
AI Engineering: Retrieval-Augmented Generation (RAG), Vector Search (pgvector), LLM APIs (Claude, Voyage AI), Prompt Engineering, LLM Guardrails & Safety, Embeddings
Big Data & Business Intelligence: Hadoop, PySpark, Big Data Analytics, Business Intelligence
Backend Development: Python (Django, Flask), REST APIs, API Integration, MVC Architecture, Authentication, Session Management, RBAC, CRUD, Object-Oriented Programming
Databases: MySQL, SQL, PostgreSQL, Database Design, Query Optimization
Cloud & DevOps: Google Cloud Platform, Supabase, Vercel, Terraform, Git, GitHub, Agile, SDLC
Other: HTML5, CSS3, JavaScript, React, Next.js, Data Structures, Algorithms, Operating Systems, Computer Networks

EXPERIENCE

Software Developer

Jan 2026 – Jun 2026

Artisans Square Private Limited

Ranchi, Jharkhand

- Promoted from Software Development Intern to Software Developer based on performance, taking ownership of production backend modules for enterprise applications.
- Developed and maintained backend functionality including REST API integration, CRUD operations, authentication, and role-based access control (RBAC) for enterprise web applications, using skills directly transferable to Python-based backend frameworks such as Django and Flask.
- Designed and optimized SQL queries, implemented backend business logic, and supported secure authentication workflows across production systems.
- Delivered core modules for a Government e-Procurement Platform (large-scale bidding system) and a Loan Origination and Loan Management System (LOS/LMS).
- Operated within an Agile SDLC, participating in sprint planning, code reviews, deployment planning, and cross-functional collaboration using Git.
- Diagnosed and resolved production bugs and delivered feature enhancements across the application lifecycle.

Software Development Intern

Jul 2025 – Dec 2025

Artisans Square Private Limited

Ranchi, Jharkhand

- Developed and deployed production-grade web interfaces and application functionality for 5+ live client websites.
- Managed deployment, hosting, DNS configuration, production releases, and post-deployment verification.
- Collaborated with backend teams to integrate components into working systems, building an end-to-end understanding of production application delivery.

PROJECTS

CryptoCast – Cryptocurrency Forecasting System | *Python, TensorFlow, LSTM, ARIMA, SARIMA* [GitHub](#)

- Built an end-to-end time-series forecasting pipeline comparing ARIMA, SARIMA, LSTM, Bi-LSTM, hybrid, and stacked ensemble models against 13 years of Bitcoin price data.
- Engineered a full data preprocessing pipeline: data cleaning, feature engineering, feature scaling, stationarity testing, sequence generation, and chronological train-test splitting.
- Evaluated model performance using MAE, MSE, RMSE, and R^2 ; the LSTM model achieved an R^2 score of 0.9933.

AI Portfolio Assistant – Personal RAG Chatbot | *TypeScript, Next.js, Claude API, Voyage AI, Supabase pgvector* (in progress)

- Designing and building a Retrieval-Augmented Generation (RAG) chatbot embedded in a personal portfolio website, grounded on a custom knowledge base of resume, project, and experience data.
- Architecting the full pipeline: text chunking and embedding (Voyage AI), vector similarity search (Supabase pgvector), and grounded response generation (Claude API) served via a streaming Next.js API route.
- Implementing production-facing guardrails: prompt-injection resistance, scope-restricted responses, and per-IP rate limiting ahead of public deployment.

Python Data Analysis & Machine Learning Pipeline | *Python, Pandas, NumPy, Scikit-learn*

- Built reusable Python workflows for data cleaning, preprocessing, exploratory data analysis, feature engineering, and model evaluation on structured datasets.
- Applied Scikit-learn for data splitting, feature scaling, model training, and prediction, comparing metrics across multiple modelling approaches.

Community Donation & Member Management Platform | *Python-transferable Backend, MySQL* [Live](#)

- Designed and deployed a full-stack platform for member onboarding, donation tracking, and administrative management, onboarding 1,000+ users in production.
- Built an admin panel with authentication, RBAC, and dynamic content management backed by database-driven workflows.

EDUCATION

Bennett University

Sep 2022 – Jun 2026

B.Tech in Computer Science Engineering, Specialization in Data Science

Greater Noida, Uttar Pradesh

- **Relevant Coursework:** Data Analysis using Python, Data Mining and Predictive Modelling, Time Series Analysis, Artificial Intelligence and Machine Learning, Big Data Analytics and Business Intelligence, Data Structures, Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming

CERTIFICATIONS

[Google Data Analytics Professional Certificate](#) – Google

[IBM Machine Learning Professional Certificate](#) – IBM

Google Cloud: Create and Manage Cloud Resources; Perform Foundational Infrastructure Tasks; Automating Infrastructure with Terraform; Set Up and Configure a Cloud Environment

[Credly Verified Badges](#) – Profile A

[Credly Verified Badges](#) – Profile B

ACHIEVEMENTS

Promoted from Software Development Intern to Software Developer within 6 months, based on performance.

Qualified for Round 2 of the Smart India Hackathon (SIH) 2024.

Selected to showcase "Travel Tales" at the Bennett University Project Showcase 2024.
